

ALL STAINLESS STEEL PAN ISLAND CEILING

Durability and elegance converge with our best ceiling system. By manufacturing all stainless steel panels we eliminate the need for a wood core. We then create an eye pleasing design that accommodates your lighting needs and emergency exit requirements.

Rectangular and square panels may be used to adapt to the unique needs of each elevator interior.

Actual ceiling design and lighting requirements are dependent on the size of your elevator cab and emergency exit placement.

Artistic Rendering. Stainless Steel Pan Island Ceiling with LED down-lights.

Our ceilings are hung from the canopy with our concealed steel bracket system and hardware. Our easy-install bracket system and detailed instructions provide you with a quick and hassle-free installation.
