

# INTEFLEX™

STACKING MODULAR WALL PANEL SYSTEM

## KENDELL™

The KENDELL™ design combines solid function with a creative flare. The upper panels add definition and height while the lower panel balances the design. A flat bar handrail complements the KENDELL™ design.

A large lower horizontal panel on the KENDELL™ visually supports three upper vertical panels. The powder-coated panel reveals proportionately divide the upper panels. The design is framed with recessed stainless steel wall base, cap and corner reveals.

Additional KENDELL™ panel designs and material selections can be seen on our website.
